

Indian Iron & Steel Sector Skill Council

QUALIFICATIONS PACK - OCCUPATIONAL STANDARDS FOR IRON & STEEL INDUSTRY

What are Occupational Standards (OS)?

- OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- OS are performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the underpinning knowledge and understanding

Contents

1. Introduction and Contacts.....P.1

Introduction

Qualifications Pack – Control Room Operator

SECTOR: Iron & Steel

SUB-SECTOR: Steel

REFERENCE ID: ISC/Q0409

ALIGNED TO: NCO-2004/NIL

Title of Job: This job is all about coordinating and monitoring the operation of various functions of steel plant (blast furnace, sinter plant, coke making, steel making, finishing etc.) for steel making through control panels, computer terminals or other control systems, usually from a central control room.

Personal Attributes: This job requires the candidate to work independently as well as in teams. Some of the key attributes includes physical fitness, not having colour blindness , having analytical skills, problem solving attitude, high concentration levels, sharp reflex, ability to manage a team and willingness to work in a factory environment.

Job Details

Qualifications Pack Code	ISC/Q0409		
Job Role	Control Room Operator		
Credits(NSQF)	TBD	Version number	1.0
Industry	Iron & Steel	Drafted on	21/11/2014
Sub-sector	Steel	Last reviewed on	25/03/2015
Occupation	Iron Making	Next review date	25/03/2016
NSQC Clearance on	20/07/2015		

Job Role	Control Room Operator
Role Description	This job is all about coordinating and monitoring the operation of various functions of steel plant (blast furnace, sinter plant, coke making, steel making, finishing etc.)) for steel making through control panels, computer terminals or other control systems, usually from a central control room.
NSQF level	5
Minimum Educational Qualifications	ITI Pass/ Diploma in Engineering
Maximum Educational Qualifications	B.E. / B. Tech Pass
Training (Suggested but not mandatory)	• Induction training on steel making process • Process-wise control parameters that need to be monitored • Basic computer operations • Operation of DCS/SKADA • 4-6 weeks on job training (mandatory) • Job specific safety training
Minimum Job Entry Age	18 years
Experience	• 1 year of minimum experience under an experienced supervisor and exposure to working in the control room • In lieu of minimum qualification the incumbent should not be considered for this role
Occupational Standards (OS)	Compulsory: ISC/N0430: Control the processes by monitoring the parameters on computer screen ISC/N0008: Use basic health and safety practices at the workplace ISC/N0096 : Works effectively with others and manage team

	members Optional: N/A
Performance Criteria	As described in the relevant NOS units

Definitions

Keywords /Terms	Description
Core Skills/Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the NOS, these include communication related skills that are applicable to most job roles.
Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of NOS.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
National Occupational Standards (NOS)	NOS are Occupational Standards which apply uniquely in the Indian context
Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
Organisational Context	Organisational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
Qualifications Pack(QP)	Qualifications Pack comprises the set of NOS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
Scope	Scope is the set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on the quality of performance required.
Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.

Sub-Sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Sub-functions	Sub-functions are sub-activities essential to fulfil the achieving the objectives of the function.
Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Unit Code	Unit Code is a unique identifier for a NOS unit, which can be denoted with an 'N'
Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
Vertical	Vertical may exist within a sub-sector representing different domain areas or the client industries served by the industry.
Keywords /Terms	Description
NOS	National Occupational Standard(s)
NSQF	National Skills Qualifications Framework
OEM	Original Equipment Manufacturer
OS	Occupational Standard(s)
QP	Qualifications Pack
5 S	Technique of maintaining orderliness –Japanese terminology
CP	Control Plan
WI	Work Instructions

ISC/N0430: Control the processes by monitoring the parameters on computer screen

Overview

This unit is about controlling a process by monitoring the operating parameters on the computer screen in the control room screen.

Unit Code	ISC/N0430
Unit Title (Task)	Control the processes by monitoring the parameters on computer screen
Description	This unit is about controlling the process by monitoring the parameters on screen.
Scope	This OS unit/task covers the following: • Prepare for the control room operation • Monitor the process parameters on the screen • Control the parameters as per SOP/SPI/Control Plan • Record observations/deviations in the process in log books/control charts
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Prepare for the control room operation	To be competent, the user/individual on the job must be able to: PC1. Read the previous shift log book and understand the various operating parameters of the last shift operation process PC2. Understand the production requirement from the supervisor PC3. Understand the process and the control room screen PC4. Ensure sufficient availability of machinery, consumables and tools required for smooth running of the operation to achieve production schedule PC5. Ensure that the process parameters set up on the operator work station are in accordance with the process sheets or instructions from the supervisor PC6. Ensure to inform supervisor in case of any abnormalities observed during execution of work and seek guidance PC7. Ensure that the bins & hopper have the required quantity of materials required to carry out smooth operation. PC8. Start up and shut down the production system in cases of emergency or as required by schedule
Monitor the process parameters on the screen	To be competent, the user/individual on the job must be able to: PC9. Monitor and analyse the trends and alarms that appear on the HMI and take necessary countermeasures by informing the supervisor PC10. Constantly communicate to the concerned control room to ensure smooth processing within the respective shops PC11. Inform the appropriate authority in case of an emergency or fire PC12. Ensure that all safety measures, interlocks, alarms are working and in conformance with the safe running of the equipment PC13. Observe computer printouts, video monitors and gauges to verify specified processing conditions and to make necessary adjustments PC14. Operate multi-function central process control machinery to grind, separate, filter, melt, roast, treat, refine or otherwise as per process requirement PC15. Ensure that work area is clean and free of any obstacle or encumbrance

Control the parameters as per SOP/SPI/Control Plan	To be competent, the user/individual on the job must be able to: PC16. Note observations/deviations in the on-going process PC17. Control/set/vary the operating parameters according to SOP/SPI/ Control Plan and take corrective/preventive measures PC18. Keep in constant touch with the Operations & Maintenance department & inform them of any change in parameters/system requirements. PC19. Ensure the effective implementation of operational policies covering all areas of the steel plant so that all relevant procedural / legislative requirements are fulfilled PC20. Take right steps according to the Emergency Preparedness procedure in an emergency situation
Record observations/deviations in the process in log books/control charts	To be competent, the user/individual on the job must be able to: PC21. Maintain shift log of production and other data and prepare production and other reports PC22. Record all instructions received during the operation process in the instruction book and all incidents in the occurrence book PC23. Inform supervisor and maintenance team in case abnormalities of data/process parameters are being noticed/recorded
Element	Knowledge and Understanding
A. Organisational Context (Knowledge of the Company/ Organisation and its processes)	The user/individual on the job needs to know and understand: KA1. Job specific documents e.g. daily checklist and importance of the same KA2. Safety policy of the company, especially related to the specific plant & process KA3. Emergency Preparedness plan of the specific work site KA4. Risk and impact of not following defined procedures/work instructions KA5. Escalation matrix for reporting identified problems
B. Technical Knowledge	The user/individual on the job needs to know and understand: KB1. The basic process under control & the effect of different parameters KB2. Function of the main equipment involved in the process KB3. Equipment/safety manuals and process documents provided by the equipment supplier to understand the equipment and processes better KB4. Systems Analysis - Determining how a system should work and how changes in conditions, operations, and the environment will affect outcomes KB5. Troubleshooting - Determining causes of operating errors and deciding necessary steps for rectification/correction KB6. Able to correctly fill in log books, read & record data generated KB7. Emergency procedures and safety measures associated with control room operation
Skills (S) w.r.t. the scope	
Element	Skills

A. Core Skills/ Generic Skills	Writing Skills
	The user/ individual on the job needs to know and understand how to:
	SA1. Construct simple sentences and express ideas clearly through written communication
	SA2. Fill up appropriate technical forms, process charts, activity logs in required format of the company
	Reading and Understanding Skills
	The user/individual on the job needs to know and understand how to:
	SA3. Read & interpret basic engineering drawings & circuit diagrams
	SA4. Read and understand SPI, SOP, Control Plans, Manuals, Health and Safety instructions, Memos, Reports, Job cards, etc.
B. Professional Skills	Oral Communication (Listening and Speaking skills)
	The user/individual on the job needs to know and understand how to:
	SA5. Express statements, opinions or information clearly so that others can hear and understand
	SA6. Respond appropriately to queries
	SA7. Communicate with supervisor
	SA8. Communicate with team members
	Analytical Thinking & Problem Solving
	The user/individual on the job needs to know and understand how to:
	SB1. Diagnose common problems in the equipments based on analysing the readings and displayed parameters
	SB2. Suggest improvements(if any) in operational processes based on experience
	Time Management
	The user/individual on the job needs to know and understand how to:
	SB3. Prioritize and execute tasks within the scheduled time limits
	Reliability
	The user/individual on the job needs to know and understand how to:
	SB4. Avoid absenteeism and maintain quality of work
	SB5. Work in a disciplined environment and adhere to working norms of the organisation
	SB6. Be punctual and adhere to timelines

ISC/N0008: Use basic health and safety practices at the workplace

National Occupational Standards

Overview

This unit covers health, safety and security at the workplace. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment.

Unit Code	ISC/N0008
Unit Title (Task)	Use basic health and safety practices at the workplace
Description	This OS unit is about knowledge and practices relating to health, safety and security that candidates need to use in the workplace. It covers responsibilities towards self, others, assets and the environment. It includes understanding of risks and hazards in the workplace, along with common techniques to minimize risk, deal with accidents, emergencies, etc.
Scope	This unit/task covers the following: • Health and safety procedures • Fire safety procedures • Emergencies, rescue and first aid procedures
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Health and safety procedures	The user/individual on the job should be able to: PC1. Use protective clothing/equipment for specific tasks and work conditions Protective clothing includes: • Leather or asbestos gloves • Flame proof aprons • Flame proof overalls buttoned to neck • Cuff less (without folds) trousers • Reinforced footwear • Helmets/hard hats • Cap and shoulder covers • Ear defenders/plugs • Safety boots • Knee pads • Particle masks • Glasses/gloves/visors Equipment includes: • Hand shields • Machine guards • Residual current devices • Shields • Dust sheets • Respirator PC2. State the name and location of people responsible for health and safety in the workplace

Various areas are listed below:

- On chemical containers
- Equipment
- Packages
- Inside buildings
- Open areas, public places etc.

PC3. State the names and location of documents that refer to health and safety in the workplace

PC4. Identify job-site hazardous work and state possible causes of risk or accident in the workplace

Hazards include:

- Working with electrical and thermal tools and equipment
- Sharp edged and heavy tools
- Heated metals
- Oxyfuel and gas cylinders
- Welding radiation
- Surfaces: sharp, slippery, uneven, chipped, broken, etc.
- Substances: chemicals, gas, oxy-fuel, fumes, dust, etc.
- Physical: working at heights, large and heavy objects and machines, sharp and piercing objects, tolls and machines, intense light, load noise, obstructions in corridors, by doors, blind turns, noise, over stacked shelves and packages, etc.
- Electrical: power supply and points, loose and naked cables and wires, electrical machines and appliances, etc.

PC5. Carry out safe working practices while dealing with hazards to ensure the safety of self and others state methods of accident prevention in the work environment of the job role

Safe working practices include:

- Using protective clothing and equipment
- Putting up and reading safety signs
- Handle tools in the correct manner and store and maintain them properly
- Keep work area clear of clutter, spillage and unsafe object lying casually
- While working with electricity take all electrical precautions like insulated clothing, adequate equipment insulation, use of control equipment, dry work area, switch off the power supply when not required, etc.
- Safe lifting and carrying practices
- Use equipment that is working properly and is well maintained
- Take due measures for safety while working in confined places, trenches or at heights, etc. Including safety harness, fall arrestors etc.

Methods are:

- Training in health and safety procedures
- Using health and safety procedures
- Use of equipment and working practices (such as safe carrying procedures)
- Safety notices, advice
- Instruction from colleagues and supervisors

PC6. State location of general health and safety equipment in the workplace

	PC7. Inspect for faults, set up and safely use steps and ladders in general use Faults : • Corrosion of metal components • Deterioration • Splits and cracks timber components • Imbalance • Loose rungs • Nuts or bolts, etc. Set up: • Firm/level base • Clip/lash down • Leaning at the correct angle, etc. PC8. Work safely in and around trenches, elevated places and confined areas PC9. Lift heavy objects safely using correct procedures PC10. Apply good housekeeping practices at all times. Good housekeeping practices: • Clean/tidy work areas • Removal/disposal of waste products • Protect surfaces PC11. Identify common hazard signs displayed in various areas PC12. Retrieve and/or point out documents that refer to health and safety in the workplace
Fire safety procedures	The user/individual on the job should be able to: PC13. Use the various appropriate fire extinguishers on different types of fires correctly. Fire extinguishers: • Sand • Water • Foam • Co2 • Dry powder Fires: • Class A: Ordinary solid combustibles, e.g. wood, paper, cloth, plastic, charcoal etc. • Class B: Flammable liquids and gases, e.g. gasoline, propane, diesel fuel, tar, cooking oil and similar substances • Class C: Electrical equipment e.g. appliances, wiring, breaker panels etc. (these categories of fires become Class A, B, and D fires when the electrical equipment that initiated the fire is no longer receiving electricity) • Class D: Combustible metals such as magnesium, titanium, and sodium (these fires burn at extremely high temperatures and require special suppression agents) Causes of fires: • Heating of metal • Spontaneous ignition • Sparking,

	• Electrical heating • Loose fires (e.g. Smoking, welding, etc.) • Chemical fires, etc. PC14. Demonstrate rescue techniques applied during fire hazard PC15. Demonstrate good housekeeping in order to prevent fire hazards PC16. Demonstrate the correct use of a fire extinguisher
Emergencies, rescue and first-aid procedures	The user/individual on the job should be able to: PC17. Demonstrate how to free a person from electrocution PC18. Administer appropriate first aid to victims as required e.g. in case of bleeding, burns, choking, electric shock, poisoning etc. PC19. Demonstrate basic techniques of bandaging PC20. Respond promptly and appropriately to an accident situation or medical emergency in real or simulated environments. few General health and safety equipment are mentioned below : • Fire extinguishers • First aid equipment • Safety instruments and clothing • Safety installations, e.g. Fire exits, exhaust fans etc. PC21. Perform and organize loss minimization or rescue activity during an accident in real or simulated environments PC22. Administer first aid to victims in case of a heart attack or cardiac arrest due to electric shock, before the arrival of emergency services in real or simulated cases PC23. Demonstrate the artificial respiration and the CPR Process PC24. Participate in emergency procedures. Emergency procedures are: • Raising alarm • Safe/efficient evacuation • Correct means of escape • Correct assembly point • Roll call • Correct return to work PC25. Complete a written accident/incident report or dictate a report to another person, and send report to person responsible Incident Report should capture: • Name • Date/time of incident • Date/time of report, • Location • Environment conditions • Persons involved • Sequence of events • Injuries sustained • Damage sustained • Actions taken • Witnesses • Supervisor/manager notified Documents: • Fire notices

	• Accident reports • Safety instructions for equipment and procedures • Company notices and documents • Legal documents (e.g. Government notices) Job titles: • Health and safety officer • First aid officer • Fire officer PC26. Demonstrate correct method to move injured people and others during an emergency
Element	Knowledge and Understanding
A. Organisational Context (Knowledge of the Company/ Organisation and its processes)	The user/individual on the job needs to know and understand: KA1. State the names (and job titles if applicable), and describe where to find, all the people responsible for health and safety in a workplace KA2. State the names and location of documents that refer to health and safety in the workplace
B. Technical Knowledge	The user/individual on the job needs to know and understand: KB3. Meaning of “hazards” and “risks” KB4. Health and safety hazards commonly present in the work environment and related precautions KB5. Possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible KB6. Activities and causes of risk and accident KB7. Methods of accident prevention KB8. Safe working practices when working with tools and machines KB9. Safe working practices while working at various hazardous sites KB10. Where to find all the general health and safety equipment in the workplace KB11. Various dangers associated with the use of electrical equipment KB12. Preventative and remedial actions to be taken in the case of exposure to toxic materials. • Exposure: ingested, contact with skin, inhaled • Preventative action: ventilation, masks, protective clothing/equipment • Remedial action: immediate first aid, report to supervisor • Materials: solvents, flux, lead KB13. Importance of using protective clothing/equipment while working KB14. Precautionary activities to prevent the fire accident Activities and causes: • Physical actions • Reading • Listening to and giving instructions • Inattention • Sickness and incapacity (e.g. Drunkenness) • Health hazards (e.g. Untreated injuries and contagious illness) KB15. Various causes of fire

	KB16. Techniques of using the different fire extinguishers KB17. Different methods of extinguishing fire KB18. Rescue techniques applied during a fire hazard KB19. Various types of safety signs and what they mean KB20. Appropriate basic first aid treatment relevant to the condition e.g. Shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries KB21. Content of written accident report KB22. Potential injuries and ill health associated with incorrect manual handling KB23. Safe lifting and carrying practices KB24. Personal safety, health and dignity issues relating to the movement of a person by others KB25. Potential impact to a person who is moved incorrectly
Skills (S) w.r.t. the scope	
Element	Skills
A. Core Skills/ Generic Skills	Reading and Writing Skills
	The user/individual on the job needs to know and understand how to:
	SA1. Read and comprehend basic content to read labels, charts, signage's SA2. Read and comprehend basic English to read manuals of operations SA3. Read and write an accident/incident report in local language or English
	Oral Communication (Listening and Speaking skills)
	The user/individual on the job needs to know and understand how to:
	SA4. Question co-workers appropriately in order to clarify instructions and other issues SA5. Give clear instructions to co-workers, subordinates others
B. Professional Skills	Decision Making
	The user/individual on the job needs to know and understand how to:
	SA6. Make appropriate decisions pertaining to the concerned area of work with respect to intended work objective, span of authority, responsibility, laid down procedure and guidelines
B. Professional Skills	Plan and Organize
	The user/individual on the job needs to know and understand:
	SB1. Plan and organize their own work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
B. Professional Skills	Working with others
	The user/individual on the job needs to know and understand how to:
	SB2. Remain congenial while discussing and debating issues with co-workers SB3. Follow appropriate protocols for communication based on situation, hierarchy,

	organizational culture and practice SB4. Ask for, provide and receive required assistance where possible to ensure achievement of work related objectives SB5. Thank co-workers for any assistance received SB6. Offer appropriate respect based on mutuality and respect for fellow workmanship and authority
	Problem Solving The user/individual on the job needs to know and understand how to: SB7. Think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s) SB8. Identify immediate or temporary solutions to resolve delays SB9. Identify sources of support that can be availed of for problem solving for various kind of problems SB10. Seek appropriate assistance from other sources to resolve problems SB11. Report problems that you cannot resolve to appropriate authority
	Analytical Thinking The user/individual on the job needs to know and understand how to: SB12. Identify cause and effect relations in their area of work SB13. Use cause and effect relations to anticipate potential problems and their solution

ISC/N0096: Works effectively with others and manage team members

National Occupational Standards

Overview

This unit covers basic practices that improve effectiveness of working with others in an organisational set-up and managing team members

Unit Code	ISC/N0096
Unit Title (Task)	Works effectively with others and manage team members
Description	This unit covers basic etiquettes and competencies that a candidate is required to possess and demonstrate in their behaviour and interactions with others at the workplace. These cover areas such as communication etiquette, discipline, listening, handling conflict and grievances.
Scope	This unit/task covers the following: - Communicate effectively with team members, co-workers and supervisors - Encourage friendly working environment - Use appropriate titles and terms of respect - Follow code of conduct and ethics as applicable - Follow organisation specific policies - Demonstrate effective behaviours for team work - Ensure engagement of team members through on-the job handholding & support
Performance Criteria (PC) w.r.t. the Scope	
Element	Performance Criteria
Communicate effectively with co-workers and supervisors	The user/individual on the job should be able to: PC1. Accurately receive, absorb and share information and instructions from the supervisor and fellow workers, getting clarification where required PC2. Display appropriate communication etiquette while working PC3. Display active listening skills while interacting with others at work PC4. Use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism
Demonstrate effective behaviours for team work	The user/individual on the job should be able to: PC5. Display helpful behaviour by assisting others in performing tasks in effective manner PC6. Consult with and assist others to maximize effectiveness and efficiency in carrying out tasks PC7. Demonstrate responsible and disciplined behaviours at the workplace PC8. Escalate grievances and problems to superiors
Ensure engagement of team members through on-the job handholding & support	The user/individual on the job should be able to: PC9. Communicate day-to-day objectives, instructions etc. to team members PC10. Guide the team members to manage day-to-day issues at work PC11. Gather concerns, feedback from team members and convey them to appropriate authorities PC12. Escalate grievances and problems to superiors
Element	Knowledge and Understanding

A. Organisational Context (Knowledge of the Company/ Organisation and its processes)	The user/individual on the job needs to know and understand: KA1. Legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions KA2. Reporting structure, inter-dependent functions, lines and procedures in the work area KA3. Relevant people and their responsibilities within the work area KA4. Escalation matrix and procedures for reporting work and employment related issues
B. Technical Knowledge	The user/individual on the job needs to know and understand: KB1. Various categories of people that one is required to communicate and co-ordinate with in the organization KB2. Importance of teamwork in organizational and individual success KB3. Various components of effective communication and importance of effective communication while communicating professional circles KB4. Key elements of active listening and importance of active listening KB5. Importance of ethics for professional success KB6. Importance of discipline and disciplined behaviour for professional success KB7. Common reasons, importance and ways of managing interpersonal conflict effectively KB8. Expressing and addressing grievances appropriately and effectively
Skills (S) w.r.t. the scope	
Element	Skills
A. Core Skills/ Generic Skills	Writing skills and reading skills
	The user/individual on the job needs to know and understand how to: SA1. Read and comprehend basic content to read instructions, labels, charts, signage's SA2. Write notes in log books etc. SA3. Prepare incident reports, as appropriate
	Oral Communication (Listening and Speaking skills)
	The user/individual on the job needs to know and understand how to: SA4. Question co-workers appropriately in order to clarify instructions and other issues SA5. Communicate with co-workers SA6. Share information with Supervisors
	Decision Making The user/individual on the job needs to know and understand how to: SA7. Make appropriate decisions pertaining to the concerned area of work with respect to safely achieving work objective following the laid down procedure and guidelines

B. Professional Skills	Plan and Organize
	The user/individual on the job needs to know and understand:
	SB1. Plan and organize their own work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
	Problem Solving
	The user/individual on the job needs to know and understand how to:
	SB2. Identify sources of support that can be availed of for problem solving for various kind of problems
	SB3. Seek appropriate assistance from other sources to resolve problems
	SB4. Report problems that cannot be resolved to appropriate authority

CRITERIA FOR ASSESSMENT OF TRAINEES

Job Role: Control Room Operator

Qualification Pack: ISC/Q0409

Sector Skill Council: Indian Iron & Steel Sector Skill Council

Guidelines for Assessment:

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below)
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria.
5. To pass the Qualification Pack, every trainee should score a minimum of 60% in every NOS.
6. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

NOSs	PCs	Marks Allocated			
		Total Marks 1000	Out Of	Theory	Practical
ISC/N0430: Control the processes by monitoring the parameters on computer screen	PC1. Read the previous shift log book and understand the various operating parameters of the last shift operation process	750	15	10	5
	PC2. Understand the production requirement from the supervisor		20	10	10
	PC3. Understand the process and the control room screen		50	10	40
	PC4. Ensure sufficient availability of machinery, consumables and tools required for smooth running of the operation to achieve production schedule		30	10	20
	PC5. Ensure that the process parameters set up on the operator work station are in accordance with the process sheets or instructions from the supervisor		50	10	40

PC6. Ensure to inform supervisor in case of any abnormalities observed during execution of work and seek guidance	30	10	20
PC7. Ensure that the bins & hopper have the required quantity of materials required to carry out smooth operation	40	10	30
PC8. Start up and shut down the production system in cases of emergency or as required by schedule and take necessary countermeasures by informing the supervisor	40	10	30
PC9. Monitor and analyse the trends and alarms that appear on the HMI	40	10	30
PC10. Constantly communicate to the concerned control room to ensure smooth processing within the respective shops	40	10	30
PC11. Inform the appropriate authority in case of an emergency or fire	40	10	30
PC12. Ensure that all safety measures, interlocks, alarms are working and in conformance with the safe running of the equipment	40	10	30
PC13. Observe computer printouts, video monitors and gauges to verify specified processing conditions and to make necessary adjustments	40	10	30
PC14. Operate multi-function central process control machinery to grind, separate, filter, melt, roast, treat, refine or otherwise as per process requirement	30	10	20
PC15. Ensure that work area is clean and free of any obstacle or encumbrance	30	10	20
PC16. Note observations/deviations in the on-going process	30	10	20
PC17. Control/set/vary the operating parameters according to SOP/SPI/ Control Plan and take corrective/preventive measures	30	10	20
PC18. Keep in constant touch with the Operations & Maintenance department & inform them of any change in parameters/system requirements.	30	10	20

	PC19. Ensure the effective implementation of operational policies covering all areas of the steel plant so that all relevant procedural / legislative requirements are fulfilled		30	10	20
	PC20. Take right steps according to the Emergency Preparedness procedure in an emergency situation		30	10	20
	PC21. Maintain shift log of production and other data and prepare production and other reports		20	10	10
